SUMMARY

IoT Engineer at Cognizant and Rutgers CS graduate, *Summa Cum Laude* (GPA 3.86). I write Python, Java, JavaScript, and C, and work with Azure IoT Hub and AWS IoT Core to build cloud-connected device pipelines. Before Cognizant I evaluated LLM outputs professionally and ran IT support for a large university. Recent Cognizant L&D training covered stakeholder communication, business presentations, conflict management, and working across global, matrixed teams. AWS certified.

EXPERIENCE

Cognizant

Brooklyn, NY

IoT Engineer (Programmer Analyst Trainee)

Sep 2026 – Present

- Build and maintain cloud-connected device pipelines using Azure IoT Hub and AWS IoT Core, supporting real-time data ingestion and device management.
- Write backend integration code in Python, JavaScript, and Java to support IoT data flows across cloud environments.
- Use GitHub Copilot CLI in daily development and completed 8 Cognizant L&D courses on communication, collaboration, and project delivery.

Handshake

Remote

AI Trainer – Generalist (Contract)

Dec 2025 – Aug 2026

- Reviewed GenAI and LLM outputs against quality rubrics, checking accuracy and reasoning across domains, then annotated training data to flag systematic model failures.
- Worked hands-on with Claude, Copilot-style tools, and Codex-adjacent systems in a professional evaluation setting.

Rutgers University – New Brunswick

New Brunswick, NJ

IT Consultant

Oct 2024 – Sep 2025

- Resolved 100+ monthly support requests for faculty and staff, tracked in ServiceNow with a consistent record of hitting SLA targets.
- Diagnosed hardware and software issues and explained fixes to technical and non-technical users.

Dunkin'

North Brunswick, NJ

Shift Team Lead

Jul 2022 – May 2025

- Ran shifts of 7-8 people while finishing a CS degree full time. Improved team throughput 10%+ by redistributing tasks during peak hours.

EDUCATION

Rutgers University – New Brunswick

New Brunswick, NJ

B.S. in Computer Science, Summa Cum Laude – GPA: 3.86

May 2026

Middlesex College

Edison, NJ

A.S. in Computer Science, Phi Theta Kappa Honor Society – GPA: 3.78

Aug 2024

PROJECTS

SmartPantry+ | *Python, TensorFlow, Flask, Computer Vision*

- Camera and barcode scanner system that tracks physical inventory in real time. A TensorFlow model identifies items, a Flask API serves results, and the app sends alerts when stock runs low.

CommitCoach | *React, Express.js, PostgreSQL, Anthropic Claude API*

- Full-stack app that sends Git diffs to the Claude API and returns structured code review feedback. Built the React front end, Express REST API, and PostgreSQL schema.

Minishell | *C, Linux, POSIX*

- Unix shell in C with a parser, piping, I/O redirection, signal handling, and fork/exec process management.

URL Shortener | *TypeScript, PostgreSQL, Redis, Docker*

- Backend service with a PostgreSQL data layer and Redis cache for fast redirects, containerized with Docker and designed to scale horizontally on AWS.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C, C++, SQL (PostgreSQL, MySQL, MongoDB), HTML/CSS

IoT & Cloud: Azure IoT Hub, AWS IoT Core, AWS (Certified Cloud Practitioner), Docker, CI/CD, Redis, Linux/POSIX

AI & Dev Tools: Anthropic Claude API, GitHub Copilot CLI, LLM evaluation, prompt engineering, TensorFlow, Scikit-learn, Git

Professional: Business presentations, storytelling, networking, personal branding, building trust, conflict management, global and matrixed teamwork

CERTIFICATIONS & TRAINING

Certifications: AWS Cloud Practitioner | Generative AI (AWS) | Google Cybersecurity | JPMorgan SWE Virtual Experience (Forage) | AI & Career Empowerment (UMD)

Cognizant L&D (2026): Building Personal Brand | Working in a Global and Matrixed Organization | Building Trust | Networking: Creating Your Elevator Pitch | Creating Business Presentations | Storytelling | A Valuable Contributor in Projects | Managing Conflict (Self-Paced)
