

Ruhil Patel

North Brunswick, NJ | (732) 822-7871 | ruhilpatel0718@gmail.com | linkedin.com/in/ruhil-patel-955101271

SUMMARY

Computer Science student at Rutgers with experience across software development, machine learning, IT systems, and AI model evaluation. Built full-stack apps, ML pipelines, and database-backed systems. Looking for a software engineering role working on large-scale systems and hard technical problems.

EDUCATION

Rutgers University – New Brunswick

Bachelor of Science in Computer Science

New Brunswick, NJ

Sep 2024 – May 2026

Middlesex College

Associate of Science in Computer Science | Phi Theta Kappa Honor Society

Edison, NJ

Sep 2022 – Aug 2024

TECHNICAL SKILLS

Languages: Java, Python, C, C++, SQL, JavaScript, HTML/CSS

Tools & Platforms: Git, Linux, Google Cloud, Flask, MongoDB, MySQL, ServiceNow, Jupyter Notebook

Frameworks & Libraries: React, Node.js, TensorFlow, Scikit-learn, Pandas, JDBC, JSP

Concepts: Data Structures & Algorithms, OOP, System Design, Incident Management, Agile, REST APIs

AI & Security: Machine Learning, Generative AI Development, Prompt Engineering, Cybersecurity Fundamentals

CERTIFICATIONS

AWS Certified Cloud Practitioner (AWS) | Developing Generative AI Solutions (AWS) | Google Cybersecurity Specialization | JPMorgan Chase SWE Job Simulation (Forage)

EXPERIENCE

AI Trainer – Generalist

Dec 2025 – Present

Handshake (Contract, Remote)

- Reviewed and refined AI-generated content across diverse domains to improve model accuracy against established evaluation rubrics.
- Annotated datasets and flagged errors, biases, and logical inconsistencies in LLM responses, contributing directly to training signal for large-scale model improvement.

Fulfillment Center Associate

Apr 2025 – Present

Amazon

Cranbury, NJ

- Maintained 99%+ accuracy across picking, packing, and shipping; identified workflow inefficiencies and collaborated with leadership to cut error rates and improve throughput.

IT Consultant

Oct 2024 – Sep 2025

Rutgers University – New Brunswick

New Brunswick, NJ

- Used ServiceNow to manage ticket queues, track incidents, and resolve service requests within SLA-compliant response windows.
- Handled complex technical troubleshooting for faculty and staff, prioritizing critical incidents and keeping thorough documentation throughout.

Shift Team Lead

Jul 2022 – May 2025

Dunkin' Donuts

North Brunswick, NJ

- Led shift operations in a high-volume environment; increased team productivity by 10%+ through better coordination and task delegation.
- Processed 100+ daily transactions with 98–99% register accuracy; sustained 95%+ customer satisfaction through proactive issue resolution.

PROJECTS

Heart Disease Prediction | *Python, Scikit-learn, Random Forest, Cross-Validation*

- Built and tuned ML classifiers for binary heart disease prediction; Random Forest achieved ROC-AUC = 1.000 and Recall = 1.000, validated with k-fold cross-validation. Applied feature importance analysis and hyperparameter tuning to minimize false negatives.

SmartPantry+ | *Python, TensorFlow CocoSSD, Flask, MongoDB, Barcode API*

- Built an AI inventory system using TensorFlow CocoSSD for real-time object detection, integrated with barcode scanning, a Flask dashboard, and a MongoDB backend with automated restock and expiration notifications.

Railway Booking System | *Java, JSP, MySQL, JDBC*

- Multitier ticketing platform with role-based access control, concurrent seat reservation logic, and an ACID-compliant normalized schema. Secured via parameterized queries and prepared statements to prevent SQL injection.

OnlyJobs | *React, Node.js*

- Full-stack job application tracker with filtering, keyword search, and status tracking across interviews, follow-ups, and deadlines.
